

This class introduces simple figure painting in watercolour, focusing on two figures placed within a dramatic setting and partly shown in silhouette. The aim is to simplify the human figure and capture mood and atmosphere rather than fine detail. A 15-minute video demonstration will guide you through the process of painting figures with confidence and simplicity. We will also study a beautiful example by the American watercolour artist Thomas Schaller, looking at how light, shape, and composition can be used to create expressive and engaging figure paintings.
