

---

In this session we will explore how to paint convincing and expressive shadows in watercolour. Shadows play a vital role in creating depth, atmosphere, and structure within a painting, and understanding how to mix and apply them effectively can transform even the simplest composition. Following a short demonstration, you will learn how to create deep, rich shadows using a variety of colour combinations rather than relying on black paint. We will explore colour mixing techniques and consider how shadows can add interest, contrast, and a sense of light to your work. This class is an excellent opportunity to build confidence in one of the most important elements of successful watercolour painting.
